

SK Abrasives CARTRIDGE ROLL

As an alternative to finishing or polishing hard to reach surfaces on precision engineered parts components and instruments, SK Abrasives Cartridge Rolls are the perfect accessory to accompany our SK Abrasives Mop Wheel.

Made of the highest quality coated abrasive fabric, the SK Abrasive Cartridge Roll is specially designed to buff, polish or clean surface areas that are inaccessible by the Light Finish Deburring Wheel. It is available in a choice of two abrasive surfaces for flexible finishing; straight or tapered.

Recommended Usage & Application

Cartridge Rolls are ideal for deburring, polishing and abrasion on small hard to reach surfaces on precision engineered items; generally a curved surface such as pipes, wheel interior or round machine fittings.
