

SK Abrasives MOP WHEEL

Even Polishing for Tough Spots

The biggest challenge when it comes to polishing any surface is the difficult task of tackling hard to reach areas such as the curves, bends and twists. The Mop Wheel with its loose and flexible flaps is the perfect answer for this.

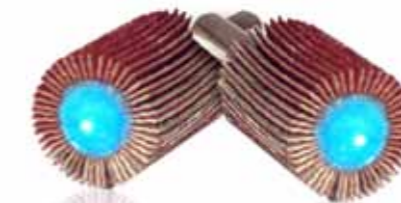

SK Abrasives Mop Wheels or fan abrasive wheels are made of Aluminium Oxide and ideal for working on hard-to-reach surfaces. Our Mop Wheels comes in a choice of various width and diameter sizes that can be applied to any flat, convex or concave surfaces.

Recommended Usage & Application

Our Mop Wheels are designed with the standard 6mm shaft that can be applied to any basic electrical or air-powered hand-held tools. The Mop Wheels are universally suitable for any surface; steel, metal, aluminium, zinc die-cast, etc.

Point of Interest

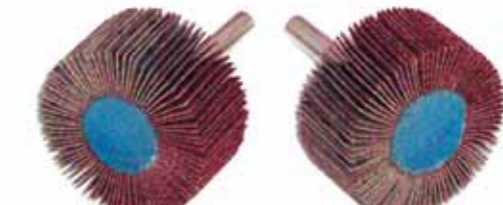

The Mop Wheel's wide abrasive surface allows a more uniform finish on large radial surface.
